ZAIN IMRAN

Full-Stack Web Developer | Next.js, MongoDB, MERN Stack Enthusiast

Gujrat, Punjab, 50700, Pakistan | +92 3226409363 | mirzazan3334@gmail.com | https://github.com/mzain4321

Full-Stack Web Developer with practical experience in creating modern web applications using Next.js, MongoDB, and Vercel, enabling efficient server-side rendering and smooth deployment. Actively expanding skills by working on projects with the MERN stack (MongoDB, Express.js, React.js, Node.js) to deepen expertise in full-stack development. Knowledgeable in building RESTful APIs, working with MySQL databases, deploying applications using Vercel, and integrating SaaS tools. Committed to writing clean, maintainable code and contributing to open-source projects to develop scalable and high-performance solutions.

EXPERIENCE

Full-Stack Web Developer | 03/2025

Freelance work

Gujrat Fans (Deployed): As a freelance developer, I built a single-page e-commerce platform for Gujrat Fans using Next.js, designed to showcase products and info about organization. The application is deployed on Vercel for performance and scalability.

Full-Stack Web Developer | 01/2025

Freelance work

Event Management Web Application: Developed a platform for creating and managing local events using Next.js and MongoDB. Included features like event listings, booking system, and an admin control panel for event organizers.

Gujrat Fan Mobile App (In Progress) | java

Freelance work

Currently developing a mobile application using Android Studio and Java for Gujrat Fans. The app will include features such as product listings, customer inquiry forms, and a user-friendly interface designed for fan retailers and buyers.
